

100% ELECTRIC, 100% LUXURY – QWEST LS with Deep Blue

GROUNDBREAKING PERFORMANCE

It's time for a new chapter in the history of marine motors. With this Apex pontoon powered with Torqeedo's Deep Blue, this chapter has begun.

APEX QWEST LS

The Qwest LS is the world's most luxurious compact pontoon boat. With elegant styling and high-end amenities, it's the ultimate in comfort and easy handling.

TORQUEEDO DEEP BLUE

Comparable to an 80HP gas outboard, Deep Blue offers a leap into a new class of electric performance. Deep Blue sets a new standard in convenience, safety and energy independence; protecting you from ever-increasing fuel prices and setting an example for ecological sensibility.

The Apex 822 TT RLS Triple Tube Pontoon with Deep Blue is the continuation of Apex's pioneering progress in the recreational boating industry. Paired with the award-winning 80HP electric propulsion system from Torqeedo, this new model delivers a new level of electric performance and an unparalleled boating experience.

The elegant helm features a wood-grain instrument panel that holds Deep Blue's innovative touchscreen on-board computer, a Humminbird color combination GPS/Fish Finder and an Infinity Stereo System with Bluetooth audio, MP3 plug-in and media storage. You never have to worry about remaining range because your speed, power consumption, battery charge status and distance from home are instantly available at your fingertips.

The plush interior boasts lifetime cushion foam, a relaxing sundeck and plenty of room for up to 13 of your nearest and dearest – offering an entertainment space that your guests will appreciate. The Qwest's rigid, dent-resistant exterior panels, stainless steel mooring cleats and premium marine carpet ensure its good looks last for years.

Starting at \$80,000, the Qwest with Deep Blue is a zero-emission, high-performance boating experience like no other. Please contact Scott Dosson at Apex Marine for more information: 989.681.4300

All-electric Qwest LS 822 RLS TT with Deep Blue

Performance Data

- Real-world runtime: 4.5 hrs*
- Max runtime: 104 hrs at 1.7mph - range 200 miles
- Cruising runtime: 2.5 hrs at 6.8mph - range 19 miles
- Full throttle: 30 min at 21mph - range 11 miles

*Real-world runtime is an average of the runtimes experienced by our users under normal boating practices.

APEX QWEST LS

Overall length: 22'-8"
Pontoon Diameter: 23"
Max Capacity: 2660 lbs
Design: Triple Tube
Hull type: Aluminum

TORQUEEDO DEEP BLUE

80HP gas equivalent power, short shaft

Two x 13kWh high-voltage lithium batteries

Touch screen instrumentation including GPS w/auto range calculation

3kw battery charger delivers full charge in 8 hours

120/240vac multi-voltage input capable

Side-mount throttle, right hand

9-year 80% capacity warranty
