

Ruckmarine Offers Electric Outboard Motor/Boat Packages

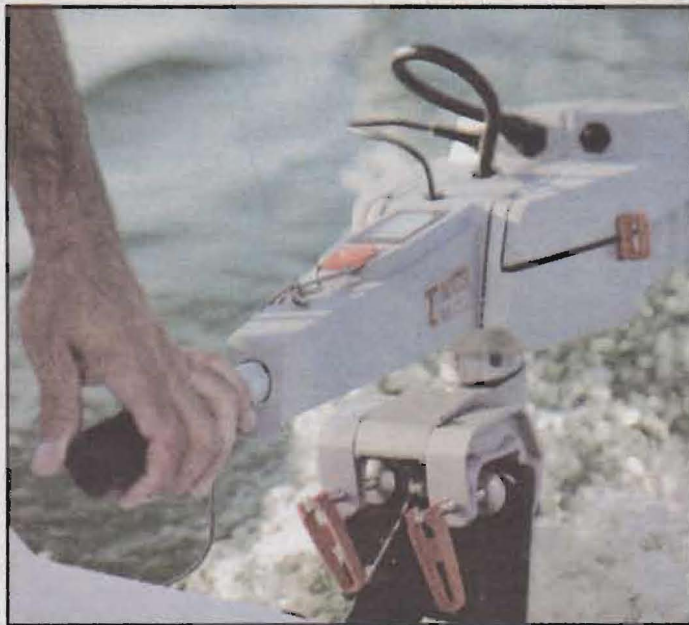

(Alameda) Ruckmarine provides Northern California with clean, quiet, maintenance-free electric outboard motors and complete electric boat packages. Ruckmarine is an authorized dealer for Torqeedo Electric Outboards, along with the KONA® 15 Electric PowerSkiff and a complete line of SCARIB® Solar-Electric Inflatables, both developed by Team Scarab Inc.

Ruckmarine's boats are ideal for fishing on the numerous restricted lakes throughout the Bay Area and Delta, Sacramento area, Sierra Lakes, and Lake Tahoe region. Many reservoirs and lakes in the area provide excellent fishing opportunities but are restricted to electric-only propulsion, or limited to 5-10 MPH speeds. The trailerable KONA electric fishing skiff and SCARIB inflatables provide convenient and affordable access to all of these waters.

"I've taken my SCARIB solar-electric runabout from Ruckmarine out fishing at places from Lake Berryessa all the way up to Sardine Lake in the Sierras!" says Chuck Bushong of Fairfield. "I'm having some great times with family and friends on the water, and it's wonderful to have a clean, solar-electric boat that I can take out fishing pretty much anywhere I want!"

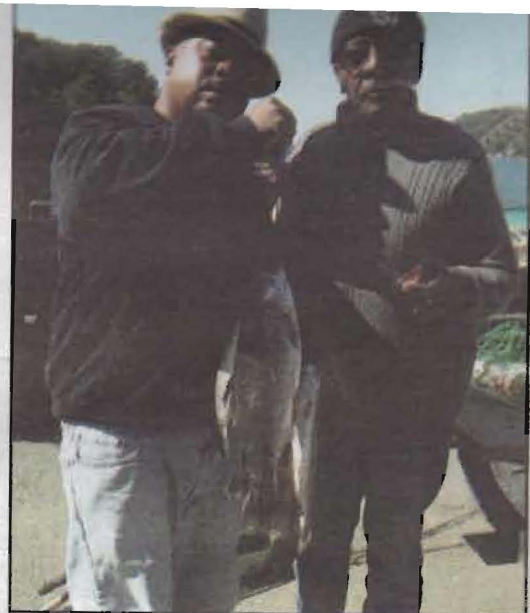

Scott Ruck started Ruckmarine after successfully converting his own outboard-powered sportboat, a project he undertook because its two-cycle outboard was no longer legal on so many lakes. He realized that more and more lakes and reservoirs were going to face motor restrictions, and decided it was time to start offering boaters more choices in clean electric boat options. After extensive research, he determined that Torqeedo GmbH of Starnberg, Germany, and Team Scarab Inc. of Santa Barbara, were delivering the best commercially-available boats and outboard motors available.

"My goal has been to provide boaters with access to as many of the beautiful lakes and reservoirs we have here in California as possible, while meeting increasing regulations and restrictions at

the same time," explains owner Scott Ruck. "I too want to keep these lakes clean, and I found the Torqeedo and Team Scarab products to be ideally suited to this requirement, so I started the business to help make these products available to as many boaters as possible."

Ruckmarine operates out of the maritime community of Alameda on San Francisco Bay, and supports customers throughout Northern California. If you're looking for a versatile electric-powered boat package, or a proven electric motor for your existing boat, give Scott a call and he'll help you figure out the best equipment to meet your needs. Visit <http://www.electricsportboats.com>, and contact Ruckmarine at 510-816-0101 or info@ruckmarine.com.
